

Addendum 2

LA01/2015/0188/F

1.0 Update

- 1.1 The Agent for the application contacted the Planning Department on Monday 23 September 2024 to request the Council to defer the application. They set out that there are ongoing trials by Moy Park to resolve air quality impact assessment regarding ammonia and that the outcome of these trials will be forthcoming. On request for a timeframe, the Agent was unable to provide same. They added that as these trials will likely affect all poultry houses, it will be a high priority.
- 1.2 Submission of such further information, if forthcoming, would be further environmental information (FEI). This will be required to be presented in the form a further published addendum to the Environmental Statement (ES). Such an addendum to the ES will require specific advertisement with a 30 day period for receipt of representations. In addition, consultation will be required with NIEA and Shared Environmental Services (SES).

2.0 Recommendation

- 2.1 That the Committee note the contents of this Addendum and agree with a new recommendation to **defer the application** to allow submission of the outcome of the trials regarding ammonia/ air quality impact assessment. This recommendation supersedes that set out in Paragraphs 1.1 and 9 of the Planning Committee Report.
